Department of ... - Giardiasis, popularly known as beaver fever, is a parasitic disease caused by *Giardia lamblia*. About 10% of those infected have no symptoms. When symptoms occur they may include diarrhea, abdominal pain, and weight loss. Vomiting, blood in the stool, and fever are less common. Symptoms usually begin 1 to 3 weeks after exposure and without treatment may last up to six weeks. Giardiasis - Wikipedia - Polycystic liver disease (PLD) usually describes the presence of

multiple cysts scattered throughout normal liver tissue. PLD is commonly seen in association with autosomal-dominant polycystic kidney disease, with a prevalence of 1 in 400 to 1000, and accounts for 8-10% of all cases of end stage renal disease. The much rarer autosomal-dominant polycystic liver disease will progress without ... Polycystic liver disease - Wikipedia -
